ECE J444/544: Engineering Outreach Lab Options

1. If you live close to Moscow, and can fit it in your schedule, you could come to campus and do the labs. If you want to do that option, please contact the TA, Hussain Beleed (bele5082@vandals.uidaho.edu) to make arrangements.

2. We have recorded a group doing the lab. We will post the raw data from that group to the web page. EO students will need to write and submit their own report.

3. We can have you participate with one of the local groups through Zoom or Skype or something similar. Timing could be a challenge.

4. If you have resources locally to make up your own variation on that lab, we are open to that, but it could be time consuming.
