

# **ECE 523: Symmetrical Components**

## **Homework #0**

Due: Session 3: [August 29]

### **BACKGROUND**

Please spend a few minutes to tell me about your background. Mainly courses taken or work experience that prepared you for this course. Also, please describe your experience using Mathcad and list which versions of Mathcad you have available. Please also describe your experience using electromagnetic transient simulation tools, and which tools you have used, if any.

### **OBJECTIVES**

Now that you've had a chance to hear my objectives for this course, I would like to hear what you would like to get out of this course. I will try to meet your objectives in the class. Please comment on the order in which you would like to see the component models prioritized, if you have a preference.
